

## **PDS Service Disruption August 27, 2024**

Mycotoxin and Ergot testing will not be available for at least 2 - 4 weeks effective immediately. The LCMS instrument used for Mycotoxin and Ergot testing is in the process of being moved to a new location. All samples received at PDS after August 23, 2024 will be tested as soon as possible once the move is complete and the instrument is back in operation.

If you prefer to send your samples to another lab, there is a lab in Ontario that does similar testing to PDS (see information below). Note that Activation Labs (ACTLABS) does NOT provide Nivalenol analysis or any of the ergot epimer analysis.

Activation Laboratories Ltd. – Global Headquarters  
41 Bittern Street  
Ancaster, Ontario, Canada L9G 4V5
