Dear swine practitioners,

I am pleased to announce that PDS has established a formal relationship with Drs. John Harding and Matheus Costa to provide swine extension for our swine clients. Dr. Harding has been involved in teaching, research, and service at WCVM since 2004. Dr. Costa completed his PhD in Veterinary Microbiology, WCVM in 2016 and is an Assistant Professor in LACS. Both are Diplomates of the American Board of Veterinary Practitioners (Swine Health Management).

Within this collaboration, Drs. Harding and Costa will:

- Provide consultation on:
 - diagnostic plans on complicated cases
 - clinical actions regarding PDS diagnostic cases
 - clinical problems with multiple cases submitted to PDS in multiple times
- Coordinate communications between PDS diagnosticians and clients on complex cases
- Make PDS aware of diagnostic test development needed and participate in PDS's test development planning
- Make PDS aware of your concerns on its services, and participate in developing solutions

The majority of consultation will be with swine and mixed animal veterinarians in western Canada. If you encounter matters that fit the above descriptions, please give Drs. Harding and Costa an email or call.

	Email	Phone
Dr. Harding	john.harding@usask.ca	306-966-7070
Dr. Costa	matheus.costa@usask.ca	306-966-7867

Please note that, for routine questions on individual diagnostic cases, you are still encouraged to contact our front office (306-966-7316) and/or the diagnostician in charge of the case.

We look forward to providing you value-added services through our collaboration with Drs. Harding and Costa.

Dr. Yanyun Huang

CEO and Anatomic Pathologist
